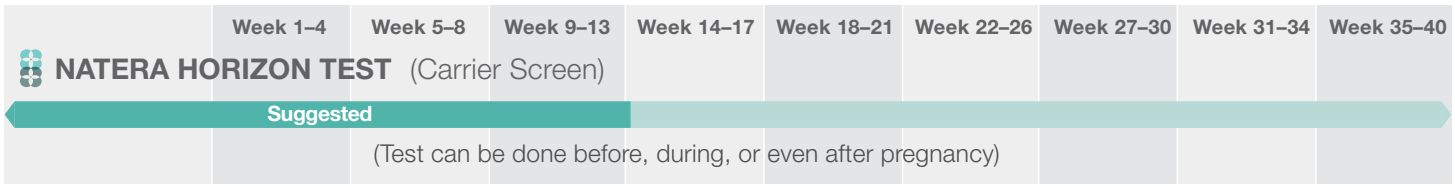
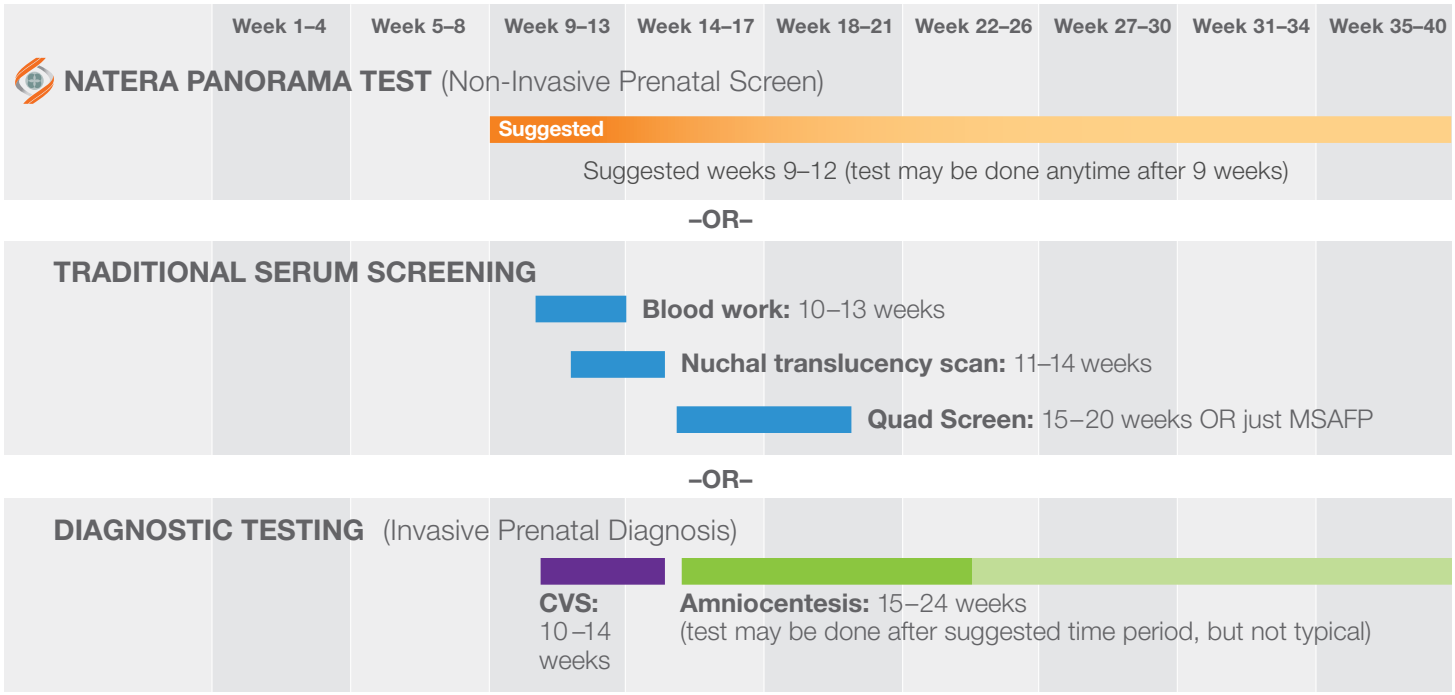
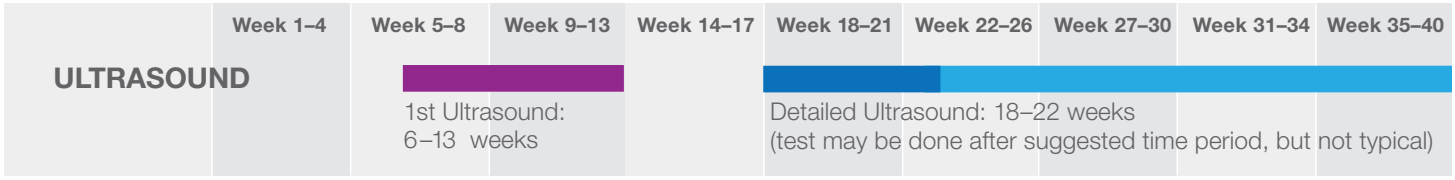
CARRIER SCREENING



CHROMOSOME ABNORMALITY TESTING Certain test results may require further testing (consult doctor)



GENERAL PREGNANCY HEALTH



CORD BLOOD BANKING

These tests were developed by Natera, Inc. a laboratory certified under the Clinical Laboratory Improvement Amendments (CLIA). These tests have not been cleared or approved by the U.S. Food and Drug Administration (FDA). Although FDA does not currently clear or approve laboratory-developed tests in the U.S., certification of the laboratory is required under CLIA to ensure the quality and validity of the tests. The choice to use cord blood stem cells will depend on a variety of factors – only a physician can determine when cord blood stem cells should be used, on a case by case basis. Many of the conditions currently treated with cord blood stem cells are genetic diseases. There is no guarantee that your physician will choose stem cell transplant over other courses of treatment. Unlike cord blood, there are currently no proven treatments using cord tissue stem cells. © 2017 Natera, Inc. All Rights Reserved. PregTimeline_2017_04_20_NAT-801547
